EMERGING MARKETS DEVELOPMENT ADVISERS PROGRAM

The Emerging Markets Development Advisers Program (EMDAP) provides implementing partners and organizations with Advisers to build local human capacity through technical assistance initiatives.

- **Focus on Development**. EMDAP Advisers **serve as volunteer consultants** in USAID-assisted projects to address specific needs in **economic growth, education, health, youth & development, humanitarian assistance and other technical areas.**
- **Quality Time**. Each Adviser placement is designed in close collaboration with the USAID Mission/Office with a **flexible 12 month timeframe**
- **Track Record**. EMDAP has **placed 250 Advisers in 49 countries since 1992**. Advisers have been **recruited from 90 top graduate schools** based on their expertise, communication skills, adaptability, leadership qualities, and analytic and problem-solving capabilities.
- **Better Value**. EMDAP advisers provide **cost effective** value – our advisers' costs range from **$75,000 to $100,000** or between one third and one half of what it often costs to recruit, prepare, place, retain, and support a mid-level expatriate professional abroad for a year-long assignment.
