

The Power
of International
Education

BRAZIL SCIENTIFIC MOBILITY PROGRAM IN THE U.S.

Training a Generation of Future Innovators

INSTITUTE OF INTERNATIONAL EDUCATION (IIE)

An independent 501(c)(3) not-for-profit founded in 1919, IIE is among the world's largest and most experienced international exchange and training organizations. Its research publications and membership services provide information to tens of thousands of international educators globally.

ACKNOWLEDGEMENTS

BSMP, known in Brazil as “Ciência sem Fronteiras” (CsF), was an extraordinarily innovative and ambitious initiative of the Brazilian government. It required close collaboration between high ranking officials in Brasília and international scholarship experts around the world to gather the necessary resources and tools to implement this high volume international exchange program in a very compressed period of time.

IIE would like to recognize and thank Luiz Loureiro at the Fulbright Commission in Brazil, as well as Jorge Guimaraes, Denise Neddermeyer and Glaucius Oliva at CAPES and CNPq, for the key roles they played in launching and leading their dedicated teams. And thanks also to all members of the IIE BSMP team, and indeed the many IIE staff in New York, as well as our university partners and internship providers across the U.S., for their unwavering commitment to the program's talented students.

ABOUT THE BRAZIL SCIENTIFIC MOBILITY PROGRAM

From 2011 to 2016, the **Brazil Scientific Mobility Program (BSMP)** - known in Brazil as *Ciência sem Fronteiras* - made it possible for many thousands of undergraduate and graduate students from Brazil to study at colleges and universities in the United States and more than 40 other countries, impacting a whole generation of young scientists and their potential to contribute to Brazilian higher education and the country's future highly qualified workforce.

Through BSMP, the Brazilian government offered scholarships to talented students to expand their educational experience in disciplines critical to the country's growth including science, technology, engineering and mathematics (STEM). **The Ministry of Education's Federal Agency for the Support and Evaluation of Graduate Education (CAPES)** and the **Ministry of Science and Technology's National Council for Scientific and Technological Development (CNPq)** spearheaded the effort to create a generation of future innovators with the applied knowledge to solve the country's greatest challenges. The program model was designed to enable students to return to Brazil to complete their degrees after one year abroad for academic study followed by a summer internship.

When CAPES and CNPq began work on this exciting and large-scale program, the **Fulbright Commission** in Brazil was a natural partner. For more than 60 years the Commission has been facilitating bilateral scholarly exchanges on behalf of the governments of Brazil and the United States. The team at the Commission brought strong experience and a deep understanding of the higher education systems in both nations.

The Institute of International Education (IIE), in close partnership with the **Fulbright Commission**, **CAPES** and **CNPq**, was asked to manage the largest portion of this unprecedented flow of Brazilian students to campuses across the United States. IIE bridged the relationships with U.S. educational institutions and other partners to achieve success for the students and the Brazilian government. IIE created and implemented systems for students to apply and be matched with English and academic programs, internships and research opportunities, in addition to sponsoring visas, monitoring student progress, processing tuition payments, issuing student living stipends, and keeping students and universities informed about program policies and regulations.

The **U.S. Embassy and Consulates in Brazil** and the **Brazilian Embassy and Consulates in the U.S.** also played a significant role in the program's success, including liaising with the Brazilian government, host institutions, students and IIE. The U.S. Embassy widely promoted the program at Brazilian universities and offered English language instruction, pre-departure briefings and facilitated visa appointments. While the BSMP students were on their programs, the Brazilian Embassy and Consulates monitored the students' success.

This report documents the accomplishments of the Brazil Scientific Mobility Program. It serves as a reference for entities in Brazil and for other organizations and governments interested in implementing large-scale, high-impact international education initiatives.

WELCOME

Allan E. Goodman

IIE was delighted to manage the Brazil Scientific Mobility Program in the United States, working closely with nearly 25,000 students and the U.S. universities and companies that hosted them over five years to fulfill the Brazilian Government's vision of a more highly skilled and internationally engaged workforce.

This innovative program opened doors for Brazilian students of all backgrounds. Many may never have had the opportunity to travel abroad, let alone study, learn English and gain professional training in the United States. BSMP also created positive ripple effects.

Brazilian universities with little previous experience facilitating study abroad are now equipped to operate internationally and prepare their students for new academic and cultural encounters. And word of the value of an American education has spread among Brazil's students and families.

Already, BSMP alumni are using the knowledge and skills they gained to begin to make change in Brazil. We expect to see these talented individuals contribute to innovation, creativity, and economic growth in the years ahead.

We are proud to share the highlights of BSMP with you, in the hope that others can learn from these successes and will be inspired by this clear example of how international education can truly change lives.

A handwritten signature in blue ink, appearing to read "Allan E. Goodman".

Allan E. Goodman

President and CEO, Institute of International Education

Luiz Loureiro

In 2011, the Brazilian government approached the Fulbright Commission in Brazil with the idea for the Brazil Scientific Mobility Program (BSMP).

Fulbright's mission is to strengthen understanding and communication between the United States and over 155 countries. BSMP was a perfect opportunity to do exactly that. Because of our familiarity with the higher education systems of both Brazil and the United States, the U.S. was able to accept BSMP students sooner and in greater numbers than any other nation.

The program succeeded in many ways. It encouraged students of great potential to pursue careers in science and technology, and hopefully become national and international leaders in areas of global concern. By providing internships, U.S. employers enabled the Brazilian government to create greater opportunities for young and talented students, and helped strengthen commercial ties between our two countries.

Study abroad can open many doors during a scholar's stay in the U.S. and in their future. But we know that we can't change an education system in just 4 years. It takes generations to create lasting change. We look forward not just to watching BSMP students apply the lessons they've learned, but also to other collaboration initiatives that the program has and will continue to encourage.

A handwritten signature in blue ink, appearing to read "Luiz Loureiro".

Luiz Loureiro

Executive Director, Fulbright Commission in Brazil

WHAT MADE BSMP DIFFERENT?

It began with a big idea: equip a generation of Brazilians with the skills to tackle the country's biggest challenges. To do this, Brazil set a goal of sending 100,000 STEM students to study for a year at the world's top universities. When they returned, it would be not just with technical knowledge—but with a new outlook on the world.

HOW IT WORKED

Through BSMP, Brazil sent students to study in the world's leading destinations for quality higher education. Over five years, colleges and universities in the United States enrolled 30 percent of all the BSMP undergraduate and professional master's students, which brought a total of **24,168** Brazilian students to U.S. campuses

Increasing annual enrollment of thousands of Brazilian students required leveraging IIE's vast higher education partner network and excellence in management infrastructure which have been highly developed through its design and implementation of the world's most prestigious scholarship programs. IIE galvanized an immediate response and ongoing support from the U.S. higher education community, necessary for the rapid implementation and sustained growth to place students in high quality academic programs, monitor their progress and support them with the resources to succeed.

BSMP was originally conceived as a program for undergraduates. Most students completed two academic semesters (or three quarters) at a U.S. college or university. If necessary, students could enroll in pre-academic English training. Many students also completed a post-academic internship. Later, a graduate academic program was introduced to offer students from Brazil the opportunity to pursue terminal master's degrees (up to two academic years) in applied technology and sciences. Graduate students were required to complete an internship and produce a thesis or engage in a capstone experience. A cohort of 579 students began their master's programs in 2014 and completed them in June 2016.

A FOCUS ON RESULTS

BSMP was different from other student exchange programs. It was:

Meaningful.

Due to strict degree requirements, few STEM students worldwide have the opportunity to study abroad. BSMP was deliberately planned to foster the types of training that would have the greatest impact on Brazil's economy and society. Furthermore, it included a large number of talented students to be able to make a real difference to an entire generation. Over the next five years, as the last BSMP student cohorts complete their degrees and enter the workforce, Brazil will begin to see the impact of this program with further effects in the long term.

Inclusive.

BSMP students represented a wide diversity of regions of Brazil, socioeconomic backgrounds and Brazilian universities, and many with limited knowledge of English. When the option became available to study English prior to the academic portion of the program, BSMP further expanded the opportunity to a more inclusive eligible pool of students.

Applied.

One of the most distinctive aspects of BSMP was its internships and research component, also referred to as Academic Training (AT) in the United States, which provided the BSMP students with practical experience they'll be able to apply in the workforce. Demand is growing for experiential learning as a component of education abroad, yet few large-scale exchange programs have been able to provide students with the opportunity to learn both in the classroom and through hands-on training. IIE coordinated with over 2,500 companies, universities and organizations to match BSMP students with internships and research fellowships for substantive experiential learning.

| Johnson C. Smith University | University of the District of Columbia |
| Lincoln University | Virginia State University |
| Morehouse College | |

Figure 8. BSMP STUDENTS ATTENDED UNIVERSITIES IN ALL 50 STATES

INTENSIVE ENGLISH PROGRAM (IEP)

English language training was a key component of BSMP. IIE arranged for English language training for BSMP students whose English language skills were insufficient for U.S. academic programs. By assessing the students' language abilities using the Test of English as a Foreign Language (TOEFL), a widely-recognized English language assessment product of Educational Testing Services, IIE identified students in need of language training and placed those with test scores below 79 on the TOEFL internet-based test (or 550 on the paper-based test) in intensive English programs. The intensive English programs ranged in duration from six weeks to two full semesters and students were matched with programs appropriate to achieve the skill level necessary for their academic and experiential learning programs.

Wherever possible, IIE worked to place students at the same institutions for English and academic study. Participation in the intensive English programs also provided students with the opportunity to acclimate to the United States before the academic program began.

The training program was a success. While improving their English language skills through immersion, students also benefited from interacting with international peers on campus and learning about American culture. For some students, admission to an institution's academic program was dependent on their language skills. The vast majority of students were highly motivated, advancing quickly through their English programs and excelling in their academic studies.

“The Syracuse University English Language Institute benefitted greatly from the positive energy and boundless enthusiasm of BSMP students. They made a great impact on both their peers and their instructors. In addition to their commitment to learning the conventions of North American discourse, BSMP students took trips, attended events, and actively engaged in on- and off-campus activities on their own initiative. The program has had a lasting effect on the Syracuse community.”

—Deborah McGraw, Interim Director, *Syracuse University English Language Institute*

STUDENT LIFE

BSMP students were placed in academic and experiential learning programs at a wide range of institutions across the United States. All types of colleges and universities hosted BSMP students: large and small, rural and urban, public and private, baccalaureate and doctoral institutions. All institutions provided students with the opportunity and support to actively engage in and adjust to their new environments in a positive way. The students impressed their host institutions and formed countless friendships and new connections within U.S. communities. These transformative experiences will impact a generation of young scientists as they continue to collaborate with their peers in the United States, building businesses and developing innovative ventures.

STUDENT SPOTLIGHT

Name: Andre Xian Ming Chang
Institution in U.S.: Purdue University West Lafayette
Institution in Brazil: Universidade Tecnológica Federal do Paraná
Major: Electrical and Computer Engineering

"Securing an internship position outside academia is a hard task. Most tech companies saw me as a temporary, low-experience employee, not worth the time and investment. Instead of trying to contact various companies like crazy in one week or so, I invested in incremental actions throughout the year. I improved my resume and cover letter every week; I submitted one or two online applications every week; I went to workshops, seminars, tech talks, industrial roundtables and job fairs; I talked with the university's employment department; I joined mock interviews and actively searched for internships. I got many interviews, but I also failed most of them.

All these trials and errors gave me so much life experience, and at some point they led me to success. All these small actions compounded together, and as a result, I found an internship in the engineering research department of a multinational company for chip verification."

Name: Adao Henrique Ribeiro Justo Filho
Institution in U.S.: Cornell University
Institution in Brazil: Universidade Federal do Ceará
Major: Computer Engineering

"Cornell and the Brazil Science Mobility Program have been an amazing experience so far. The courses are hard and the workload is even harder, but that translates into a really good feeling of mission accomplished when they're done. Here I've joined the "CUAir" project team as member of the sub-team in charge of designing the autopilot system for an unmanned autonomous aircraft. I also had the chance of studying and working with robots in the Robot Learning class. On top of all that, I was accepted to work at NVIDIA during my summer academic training. I'll work on the development and testing of a product that is going to be sold worldwide to millions of customers, and I'll have the opportunity to experience the workflow of a multinational company and world leader in Visual Computer Technologies."

STUDENT SPOTLIGHT

Name: Cassia Boos Ortolani
Institution in U.S.: Washington University in St. Louis
Institution in Brazil: Universidade Federal do ABC
Major: Biomedical Engineering

"Throughout this year I faced the most challenging and rewarding experiences I could ever imagine. In April, the annual Clinton Global Initiative University meeting took place in my university. Students, youth organizations, topic experts, and celebrities all met to discuss and develop innovative solutions to pressing global challenges across areas such as education, poverty alleviation, and public health. As a volunteer, I was thankful to see incredible commitment-makers from all over the world, putting their efforts to translate practical goals into meaningful results. I was surprised when one of them came to me, after I presented myself as an exchange student from Brazil, and gave me a huge hug in front of the whole plenary saying "thanks" for representing my country, and helping make the event happen.

The next challenge was about to come when I got the opportunity to do research at University of California in San Diego during the summer. I was thankful to be part of an amazing group that studies the use of a high performance wireless sensor that sticks to the skin like a temporary tattoo. This device opened up a new frontier in developing the newborn brain, and simultaneously reduced the physical barriers between parents and newborn babies in intensive care. It allows parents to develop a sense of security and bonding through skin-to-skin contact between them and the baby."

KEEPING STUDENTS CONNECTED

IIE collected and distributed critical information to keep all BSMP students informed of program deadlines through the monthly e-newsletter, the *Boletim Mensal*. Using this communication channel, IIE also created a space to connect students with one another's experiences. A popular feature of the *Boletim* was the "Student of the Month" column, through which students shared their stories and reflected on lessons learned during their BSMP experience.

"As a land grant institution, UC Davis was created to help solve the problems facing our state. BSMP students are here with a similar mission. To see them succeed has been one of the most satisfying experiences of my career."

— Jacob Hosier, Academic Director of Global Study Program,
University of California, Davis

PROGRAM HIGHLIGHTS

COLLABORATION WITH THE U.S. HIGHER EDUCATION COMMUNITY

All host institutions welcomed the BSMP students into their student populations on campus, and some went above and beyond in providing strong support for the success of the program and the individual students. According to a 2016 survey of participating institutions, nearly 15 percent offered financial aid to students. Aid came in the form of fee waivers, merit scholarships, housing and meal stipends and research stipends. Many institutions offered enhanced support services to BSMP students on their campus, such as dedicated advisors and faculty members to guide students through their academic experience.

The program left a lasting mark on many of these institutions, many of which attribute BSMP to increasing partnerships with Brazilian institutions, greater study abroad options to Brazil for U.S. students, and strengthened Brazil-focused student organizations, cultural programming and events on campus. More than 1 in 5 survey respondents has had BSMP undergraduates return for graduate programs.

INTERNSHIPS AND RESEARCH

After a year of academic study, most BSMP students took advantage of the opportunity to put their knowledge to work. Over the duration of the program, 15,910 students participated in summer internships and research programs at a variety of organizations, from Fortune 500 corporations to startups and nonprofits. Others worked alongside university professors on cutting-edge research into clean energy and waste management. In these positions, students gained both hard and soft skills, engaging in two-way exchanges of culture and knowledge.

IIE provided resources to all students including resume and cover letter assistance, an online opportunities board that connected students with open positions, and ongoing support throughout the experience.

"I highly recommend the students from the BSMP because they arrive at the lab already with significant research experience. They brought a terrific energy to our lab and I feel other hosts shared similar experiences with their interns."

—Erin E. Jordan, *AbbVie Inc.*

SAMPLE OF CORPORATE PARTNERS

For global corporations, the benefits of participating in the BSMP program were clear. Many companies are looking to expand their operations in South America and throughout the world, and seized the chance to build a pipeline of talent in the countries where they do business. Students gained skills at more than 2,500 organizations, including:

- AbbVie
- Amgen
- Boeing Company
- Cargill
- DuPont
- Embraer
- Facebook
- FreshDirect
- General Electric
- Google
- Mayo Clinic
- Memorial Sloan Kettering Cancer Center
- Reed Elsevier
- Petrobras America
- Pfizer
- Praxair
- Rama Business Group
- United Nations
- World Health Organization

ON-THE-JOB EXPERIENCES

Students gained hands-on work experience through experiential learning projects during their internships and research fellowships that will help them launch their careers. Experiences included:

- Participating in a team competition to develop a flight path for drop-in biofuel for aviation in Brazil, presented to the president of CAPES and the president of Boeing in Brazil.
- Working alongside top scientists on oncology drug discovery, following the process of drug development from idea to final product.
- Helping provide technical support to Embraer aircraft in the U.S. and Latin America.

STUDENT STORIES

Building more sustainable cities

It wasn't until he came to the United States that **Luis Strengari** understood the shortcomings in Brazil's public infrastructure, such as systems for water, sanitation and public transport. Strengari studied civil engineering at Rutgers through BSMP, and participated in an internship helping to improve the resilience of the New York City subway system after Hurricane Sandy. The experience was his first exposure to green infrastructure projects, and Luis was inspired to bring his knowledge back to Brazil. **Strengari was hired by Spanish multinational company Idom, and now works to develop infrastructure in Brazil's favelas, bringing sanitation and better urban development to thousands of people in his home country.**

Pushing boundaries

Marcela Alves and **Brenda Miranda**, both BSMP students, were chosen as finalists in the Women Vendors Forum and Exhibition Tech Challenge. Their submission was EmpowerIt, an application designed to promote women-owned

businesses. The benefits of BSMP, Alves says, were manifold. Beyond studying computer science (with a professor who was the author of her textbook), Alves learned English, discovered a new culture and got involved on campus. **"People should not feel afraid of leaving their families and their country for some time," she says. "It is an opportunity to mature as person and discover that we are limitless."**

Working together to make a difference

Germano Johansson had always been passionate about urban studies, and a BSMP grant took him to the USC Price School of Public Policy. **"The program introduced me to social aspects of cities and human relations that my undergraduate civil engineering program could not provide,"** Johansson explains. Johansson co-founded the Institute of Collaborative Urbanism (COURB), an organization that recruits talented young people to create sustainable solutions for cities. **"COURB is already benefiting communities in both the U.S. and Brazil. I am grateful for this opportunity and look forward to giving back."**

BSMP IN THE NEWS

The Brazil Scientific Mobility Program made headlines around the world for its innovative, inclusive approach. Below are a few selected highlights.

Mashable included BSMP in a list of global efforts to get women and girls involved in STEM. It also mentions Brazil's number-one ranking in gender equality in STEM degrees and careers.

Nearly 50 students learned to build small NASA satellites during summer training at Capitol Technology University. Using Raspberry Pi and open-source flight software, participants built satellites using technologies that had never before been available to students.

Inside Higher Ed reported on the rapid growth of BSMP, which more than doubled its enrollment between 2012 and 2013. The partnership was strategically important for both Brazil and for U.S. universities, the article explained, laying a foundation for long-term knowledge exchange.

IIE announced that more than 400 companies hosted internships for BSMP students in the fall of 2014. Students participated in a variety of STEM-related projects, from researching aquatic plants' capacity to absorb pollutants to working with a police department's forensic crime scene unit.

Studies show that doctors who trained abroad are most valued in Brazil, and in most recent years there has been a higher number of women in the field. Jornal do Commercio mentions BSMP as a contributor to this incredible growth.

U.S. News & World Report described the influx of students from Latin America who have come to study in the U.S. The spike is due in part to programs like BSMP, which is highlighted in the article.

In 2014, Fusion.net credited BSMP for Brazilian students' interest in graduate programs in the U.S. That year, acceptances of Brazilian students jumped 98 percent to 1,983 students.

When the International Atomic Energy Agency hosted its first-ever Nuclear Olympiad, a video competition for university students, Alice Cunha da Silva, a BSMP grantee, won the competition. Her winning video has nearly 50,000 views on YouTube.

Grantee Luis Felipe Longo Micchi, along with Dr. Steve Kraemer, discovered a possible new supernova during his internship at Catholic University of America (CUA). The supernova candidate is located in the nearby galaxy Mrk 477.

"We need a skilled, educated workforce—which is why American and Brazilian companies have pledged to help increase student exchanges between our two nations. We need a commitment to innovation and technology—which is why we've agreed to expand cooperation between our scientists, researchers, and engineers."

—U.S. President Barack Obama

PROGRAM STRUCTURE: IIE'S ROLE IN MAKING MOBILITY HAPPEN

IIE facilitated BSMP, the U.S.' incarnation of *Ciência sem Fronteiras*, from end to end. At the program's peak, over 75 staff members were dedicated to the BSMP effort, from university liaisons, grant management, student advisors and staff support roles in human resources and accounting. IIE handled all aspects of the program.

SPONSOR RELATIONS

As soon as the BSMP was launched in 2011, the Sponsor Relations team got to work. Throughout the program, they liaised between the Ministry of Education, CAPES, CNPq, and other invested parties; the U.S. Embassy and Consulates in Brazil and the Brazilian Embassy and Consulates in the U.S.; students; the media; and other teams within IIE.

"The Sponsor Relations team is extremely proud of the relationships we've built. Our work will benefit not only alumni and their home institutions, but also future government and private-sector initiatives in Brazil."
—Yolande Zahler, Senior Manager, Sponsor Relations

INSTITUTIONAL RELATIONS

IIE also managed communication between college and university staff (including vice presidents, professors, bursars, admissions and housing directors) and Student Relations Officers. IIE's Institutional Relations team communicated daily with institutions to clarify program expectations, guidelines, application procedures, timelines and policies via email, newsletters, presentations and website content.

Over 400 U.S. colleges and universities hosted BSMP students

VISA SPONSORSHIP

Understanding visa requirements and restrictions can be complicated. IIE's dedicated Visa Sponsorship team made students' experiences easier. IIE sponsored J-1 visas for all students and advised students on best practices. The Institute also kept up to date on policy changes, monitoring students' status during the program, and performing SEVIS updates as necessary.

IIE team members traveled to Brazil 20+ times to coordinate student visas with the U.S. Embassy and Consulates in Brazil

PLACEMENT

Students were placed in colleges and universities throughout the United States, all with different program requirements, deadlines, orientation and class start dates and campus cultures. The Placement team kept abreast of all of these variables, matching tens of thousands of students to opportunities at the undergraduate and graduate levels. The team worked closely with students to accommodate their preferences for placement. The Preacademic team placed students at institutions offering ESL training, as necessary, placing students at the same institution for both English and academic training where possible.

1 out of 3 participants were placed at their top-choice institution

GRANTS AND DATA MANAGEMENT

Processing payments to hundreds of universities—on behalf of thousands of students—is a major undertaking. The Grants and Data Management team developed and managed the grant process, executing invoice payments, stipends, refund requests, vendor requests, bank information requests, check deposits, expense reports and other financial and grant activities. The group also managed all divisional data and reporting among other IIE teams.

IIE disbursed more than \$1 billion to organizations and students for BSMP since 2012

STUDENT RELATIONS

IIE's Student Relations team helped students transition to American university life. Once they began their academic programs, all students were assigned a Student Relations Officer based in the same region as their host institution.

Students came to their Student Relations Officers with questions on program policies and for help in times of crisis. Student Relations also developed relationships with foreign and U.S. consulates and embassies in aspects of program development and administration.

"Student Relations provided support and guidance to make each grantee as comfortable as possible."
—Shannan Spisak, Assistant Director, Institutional and Student Relations

EXPERIENTIAL LEARNING

Many BSMP students identify academic training (including summer internships and research assistantships) as the highlight of their scholarship experience. IIE's Experiential Learning team made internships and research options possible. The team facilitated more than 15,000 opportunities over the course of the program, from developing relationships with organizations and university research facilities to offering training and resources to students on how to search for and secure a position.

Students have participated in internships and research in every U.S. state and across industries

FINAL THOUGHTS

BSMP was a unique initiative of the Brazilian Government to internationalize higher education, with particular focus on STEM fields. It started with an ambitious goal – to make a world-class education possible for thousands of students. In Phase 1, almost 93,000 students benefited from those scholarships, 80% of them undergraduates from diverse regions, backgrounds and universities in Brazil. The fact that nearly 25% of those chose to study and were hosted at universities throughout the U.S. is also a tribute to the close relationship that exists between our two countries.

IIE is extremely proud of its major involvement in the design and implementation of BSMP in the U.S., and already foresees the long-lasting impacts and contributions these students will make towards innovating Brazilian higher education, the economy and society at large upon their return home and insertion in the labor market. Through its collaboration with the Fulbright Commission, CAPES and CNPq, IIE remains committed to helping facilitate and strengthen the relationships established between U.S. and Brazilian institutions of higher education to further promote exchanges that continue to have a positive influence on the open flow of knowledge and skills across the globe.

LIFE AFTER BSMP

After their year in the United States, BSMP students returned to their home universities, or began their careers following graduate work. Many have found innovative ways to keep their international experiences alive.

Putting BSMP lessons into action

Peirol Gomes '13
University of Alabama in Huntsville
Management Engineering

When Peirol Gomes returned to Brazil after completing his BSMP rotation, he had an idea. He knew the goal of BSMP was for students to bring new ideas with them back to Brazil. But where were they supposed to share their knowledge? Gomes created MyCSF, a website designed to connect past, present and future students for advice, networking and idea exchange. The website attracts more than 30,000 visitors a month and has more than 16,000 newsletter subscribers.

"It started as a way of giving thanks for the opportunity that I received," Gomes says. "I believe BSMP will make a huge impact in Brazil in 10 to 15 years. What we're trying to do with MyCSF is to make these things happen in the near future."

A new outlook on learning

Darlan Santan Farias '15
Indiana University
Computer Science

Taking courses at an American university opened Darlan Santan Farias' eyes to several differences between American and Brazilian educational systems. For one, when he began his studies at Indiana University in the United States, he was surprised to learn that he had flexibility in the classes he chose. "That's how I discovered that I was passionate about machine learning and data mining," Farias says.

After an internship at Carnegie Mellon University, Farias returned to Brazil to do research related to data mining and apply to graduate programs. "I never would have considered this work before BSMP," he says. Farias is

also working with former BSMP students on a program to engage other students to create innovative projects with social impact.

Inspiration to teach others

Kaio Jonathas '13
Montana State University
Electrical Engineering

"Before BSMP, I wasn't sure what I wanted to do after graduation," Kaio Jonathas says. That all changed after a year at the Montana State University. "I had a great experience in a course on electro-optical systems, where I was able to study optics for the first time in the lab. At the university where I studied in Brazil, it wasn't possible for us to have such expensive labs and equipment."

After returning to Brazil, Jonathas finished his degree and became a professor at the same university where he was once a student. "After watching great professors give classes, I realized I wanted to be like them. I wanted to help people learn what I had learned." Jonathas plans to return to the U.S. to pursue a Ph.D. in optics.

Figure 10. BSMP HAS TAKEN STUDENTS IN MANY DIRECTIONS

*Data collected from grantees who completed AT Summer 2015

CLOSING REMARKS

"The Brazilian Embassy was happy to be part of this endeavor, along with all Consulate-Generals in the U.S. We firmly believe that BSMP will have a lasting effect on the lives of participant students, inspiring them to build careers that are successful for them and productive for their communities.

Apart from that human dimension, we think the program will help shape an even better future for Brazil, stimulating our transformation into a knowledge and innovation-based economy."

—Franklin Netto
Counselor, Head of the Education Section at the Brazilian Embassy in the U.S.

"The United States is proud of our higher education system and we are honored that Brazil chose to send so many of its students to study in our country through the Brazilian Scientific Mobility Program. We consider bilateral educational cooperation a cornerstone of our work at the Embassy, and are thrilled that the program was such a success in bringing American and Brazilian students, faculty and institutions together."

— Abigail L. Dressel
Counselor for Public Affairs at the U.S. Mission to Brazil

At the Institute of International Education (IIE), our approach to international education and exchange – diverse, borderless, impactful – is a proven way for governments to cultivate a national workforce able to compete in the global economy. As the world leader in international education, IIE designs and implements programs that advance scholarship, build economies and promote access to opportunity for all people in more than 180 countries around the globe. We manage scholarships and fellowships for the U.S. government, including the Fulbright Program. We create and manage scholarship and training programs for other governments as well, including Brazil's Scientific Mobility Program and the Confucius China Studies Program. We help governments expand research and development efforts by promoting university partnerships and linkages. Through the power of international education, IIE helps countries strengthen their workforce, thrive in the global economy and work together to pursue a more peaceful, prosperous and equitable world.
