Undergraduate student enrollment: 7000	Public/Private: public
Graduate student enrollment: 3000	Type of Institution: non-commercial joint-stock company (NpJSC)

Institutional Description (limit 250 words):

Astana Medical University is one of the largest and dynamically developing medical universities in our country, has a high reputation in the field of higher medical education, its own traditions, both in the provision of educational services and in the development of medical science and clinical activities

On October 26, 1964, the Council of Ministers of the Republic adopted a resolution on the opening of a medical institute in Tselinograd. In 1997, the institute was reorganized into an academy, and since January 2009 it has achieved the status of a University.

It should be noted that not only the name and status of the university has changed, but also the number of specialties has increased, credit learning technologies and a three-stage education system have been introduced - bachelor's, master's, doctoral studies, the number of students has increased, active work is underway to introduce innovative technologies into the educational process. The clinical bases of the University are the largest national and republican centers - subsidiaries of the National Medical Holding.

The University has been consistently ranked among the leading medical universities of the Republic of Kazakhstan for many years. The University's academic partners are leading universities in the USA, Singapore, Europe, and Russia.

The status of the university poses new challenges to us in medical education and science, opening up broad prospects for sustainable and long-term development.

Partnership Information

Possible Academic Areas of Collaboration:

- Biomedical Research
- Public Health
- Medical Education
- Clinical Trials
- Telemedicine and Healthcare Technology
- Global Health
- Medical Ethics and Humanities
- Healthcare Management and Administration

Institutional Strengths:

- High-Quality Education: Known for excellent teaching and faculty expertise, ensuring students get top-notch medical training.
- Active Research: Strong focus on research in biomedical sciences, clinical studies, and public health, contributing to medical advancements.
- Clinical Experience: Partnerships with major healthcare centers provide students with hands-on training in various medical fields.

- Global Connections: Collaborations with top institutions worldwide offer exchange programs and research opportunities for students and faculty.
- Embracing Innovation: Integrating new technologies and teaching methods to keep pace with the changing healthcare landscape.
- Forward-Thinking Approach: Always adapting to meet the evolving needs of medical education and healthcare in Kazakhstan and beyond.

Partnership Interests: *(e.g., faculty exchanges, student exchange, dual degrees, joint research, distance learning, etc.)*

Astana Medical University seeks partnership opportunities with U.S. universities, including:

- Faculty exchanges
- Student exchanges
- Dual degree programs
- Joint research initiatives
- Distance learning programs
- Clinical exchanges
- Professional development workshops.

In essence, collaborating with a U.S./Kazakh institution aligns with Astana Medical University's mission to advance medical knowledge, promote excellence in healthcare, and cultivate future generations of healthcare professionals. Through collaboration, we aim to create synergies that benefit our institution, our partners, and society.

Interest in Partnership: Why are you interested in partnering with a U.S./Kazakh institution? What do you hope to gain from such a partnership?

Astana Medical University seeks to partner with institutions like the Johns Hopkins Bloomberg School of Public Health to:

- Strengthen expertise in public health.
- Drive impactful research initiatives.
- Foster interdisciplinary learning.
- Elevate academic reputation.
- Expand global networking opportunities.

Through collaboration, the university aims to advance medical knowledge, promote excellence in healthcare, and prepare future healthcare professionals for societal needs.
