

Quick Facts

Location (city, state): Berkeley, California USA

Website: <https://haas.berkeley.edu/>

Undergraduate student enrollment: 700

Public/Private: Public

Graduate student enrollment: 1800

Type of Institution: University

Institutional Description (limit 250 words):

- As the second-oldest business school in the United States, the Haas School of Business at the University of California, Berkeley has been questioning the status quo since its founding in 1898.

As a leading school at the University of California, Berkeley, our 2500 students in six degree programs are part of a larger, diverse student body comprising 45,000 undergraduate and graduate students, alongside 1,100 postdoctoral fellows, With three proximal National Labs (Berkeley Labs, Joint BioEnergy Institute, Livermore National Labs), a FY23 research budget of 1.07 Billion, and top-ranked graduate programs in engineering, health, computer science, biological sciences, and chemistry, UC Berkeley is one of the premier research institutions in the world.

Partnership Information

Possible Academic Areas of Collaboration:

Training for technology commercialization and entrepreneurship (ideation to scaling to funding); Sustainability and innovative financial models for rapidly growing markets.

Institutional Strengths: Through running the NSF I-Corps Node (across UC Berkeley, Stanford, UCSF) we are a US leader in training faculty, researchers, grad students and postdocs in how to find sustainable business models for their inventions. We frequently work with other governments, including Japan, Korea, Ukraine, to replicate this training by training teams as well as faculty. We also partner with other countries such as India, Malaysia and Turkey through our Center for Growth Markets. These include joint research projects on sustainability and innovative financial models to meet the needs of rapidly growing markets.

Partnership Interests:

Identifying and supporting top Kazakh students for our MBA program. Distance/in-person training for technology commercialization and entrepreneurship. Hosting researchers and scholars for joint research projects in sustainability and innovative financial models. *(e.g., faculty exchanges, student exchange, dual degrees, joint research, distance learning, etc.)*

Interest in Partnership: Why are you interested in partnering with a U.S./Kazakh institution? What do you hope to gain from such a partnership?

We have had wonderful Kazakh MBA students and would love more. We have previously partnered with Kazakh institutions for entrepreneurship training (both distance and in-country). It was a fantastic experience that we wish to replicate.
